Only about 10 people took advantage of the unseasonably mild January weather to come out to the January 8 Sport Launch. Chris Land took care of the RSO/LCO duties, and that was greatly appreciated.

Who woulda' thunk that Glenn Feveryear would be right behind Dale Greene in the "Most AP Burned" category? No one. Who woulda' thunk that an Aerotech G80 would CATO and blow a hole the size of Montana in the side of his *Javelin 4.0*? Everybody. Got one from that bad batch, eh Dale? Ron Saul pretty much spanned the NS range for model rocketry by flying a 1/2A in an Estes *Quark* and an Aerotech G33 in a PML *Tiny Pterodactyl*. Mark Beever keeps using up the old man's stash of Estes D12's by flying his LOC *Viper III* twice, so is there any wonder why dad only has enough bucks left to burn up four C6-5's? [All together now, boo-hoo]. Mike Brubaker had help from guest Alex Bowers in flying his *Fat Boy* twice on D12's.
