SPARRSPAM-13

Or was it -14? Ah, I lost track. All I know is that we had great weather for flying rockets and for eating, and we did a lot of both.

I think the frequent flyers of the day were the Wickers, Bob and daughter Catherine. They flew a whole bunch of clones of old Estes kits from the 60's and 70's, like the *ARCAS*, *Cherokee D*, *Ranger*, *Aerobee 300*, *Avenger* and *Cobra*. A man after my own heart. Larry Gerlach courted danger by once again fling his 1968-vintage Estes *Big Bertha*. He was gone an awful long time recovering that one after a great flight on a C6-5. Isn't it about time to retire that grand old bird in a place of honor in your home, like by your shrine to the Philadelphia Eagles? Jim Cox impressed the crowd with another flight of his Estes *Silver Comet*, modified to accept the Kosden G75 motor. Mark Beaver had another ice flight on his LOC *Viper III* on three Estes D12-7 motors. Rick Hackman flew the usual assortment of scratchbuilt models with the usual interesting results. Always entertaining.

We had a large number of guests, which is always a good sign. We hope they enjoyed themselves, and if they're reading this, come on and join us!

Food. Then there was the food. Boy, was there food. Not to mention the really great facilities that Chris Land made available for our use to warm and serve the food. Thanks, Chris, and thanks to everyone who did range duty. Great job!!
